1160	<b>Cars</b> 1970's-2000's valuable modern MUH accumulation with up to 3 of each in later issues all on Hagners in 3 binders. Semi-sorted into classes of vehicle but much work still to do. The "raw material" for a competitive exhibit is here if purchaser is prepared for the challenge. As expected in such a comprehensive coverage of this period, a fair % is "back of the book" however these have not been assessed in arriving at the conservative reserve. Most have been supplied to collector by new issue service & many are still in original glassines. Housed on over 120 Hagners. (100s)	\$300

Some prelim organisation into classes of vehicles e.g. vintage, racing cars, sedans with lots of work ahead for purchaser. 1162	<b>Cars</b> 1990-2011 impressive, mainly MUH, accumulation with up to 3 sets of each from new issue supplier in 3 stockbooks. The earlier tend to be one set of each increasing in the 2000's. Considerable organisational task ahead for purchaser but will repay effort. (100s)	\$300
1163	<b>Cars</b> Huge accumulation of stamps, sheetlets, covers, Prestige booklets, special cancels, advertising machine marks etc from Australia (much Aust Grand Prix related), commercially used with auto-related slogans plus around the world with recent issues in glassines of new issue services with useful duplication to swap or sell. Potential basis for competitive display with organisation & patience, especially if combined with the other "car" lots listed below. Please view with great care as majority are loose in new issue bags & the box is crammed full. (100s)	\$500

Also Liverpool (NO 7 1851 b/s) &amp; s/I "SOHO St" with "per Royal Mail Steamer Africa" in m/s. Uprated by "5 CENTS" in red applied on front. In addition this is a fascinating piece of correspondence as addressed to George Bond who was later Harvard Observatory Director &amp; is credited with jointly discovering the crepe ring of Saturn. The letter is written by William Lassell, the prominent English astronomer, regarding the famous discovery of Ariel &amp; Umbriel, two new moons of Uranus in 1851. It reads "I scarcely expected when so attentively scrutinizing the satellites of Uranus on one of the evenings you spent with us, that I should be able so soon to announce to you definitely and positively the discovery of two new satellites accompanying the planet Uranus". That year when visiting Liverpool, this was the only local Queen Victoria wished to meet in person. If this is the original correspondence of this discovery then obviously worth a lot more than the estimate but further research does not confirm the exact dates though it would be understandable that George Bond would be one of the first to be advised especially since the discovery was made on his visit.
